

## Contents

### *Sedimentary Geology, Volume 50, 1987*

#### A collection of invited papers to the 50th volume

Reworking of muddy intertidal sediments in the Severn Estuary, southwestern U.K.—A preliminary survey J.R.L. Allen (Whiteknights, Great Britain) .....	1
Modern carbonate-siliciclastic transitions: humid and arid tropical examples H.H. Roberts (Baton Rouge, La., U.S.A.) .....	25
Deep-burial diagenesis: its implications for vertical movements of the crust, uplift of the lithosphere and isostatic unroofing—A review G.M. Friedman (Brooklyn, N.Y., U.S.A. and Troy, N.Y., U.S.A.) .....	67
Current aspects of basin analysis G. deV. Klein (Urbana, Ill., U.S.A.) .....	95
Semi-allochthonous sedimentation in the Apenninic thrust belt F. Ricci Lucchi (Bologna, Italy) .....	119
Desert sedimentary environments, present and past—A summary K.W. Glennie (London, Great Britain) .....	135
Problems and progress in the research on soft-sediment deformations A.J. van Loon (Oosterbeek, The Netherlands) and K. Brodzikowski (Wrocław, Poland) .....	167
Diagenetic evolution of Cenozoic sandstones, Gulf of Mexico sedimentary basin L.S. Land, K.L. Milliken and E.F. McBride (Austin, Tex., U.S.A.) .....	195

---

## Announcement

Volume 50(4) will consist of a Author and Subject Index of Vols. 1–50.
